We have owned our 1965 Morris Minor convertible since 2009. Prior to this we owned three other Minors. During this time there have been many minor safety and comfort upgrades carried out including halogen headlights, hazard warning and fog lights. High back seats with head restraints have been fitted to make long distance touring more comfortable and less stressful. An uprated 1098cc engine coupled to a five speed gearbox makes it easier and safer to keep up with modern vehicles on today's roads and motorways. Hopefully, when we get out of the current Covid situation, we will be able to get touring again.
